

## Annex 2: Test item, time and charges for special-use cosmetic products

Item	Hair growing products	fitting/breast beauty products	Hair dye	Permanent perm	Sun screening products	deodorant	Spot lightening products	Hair removal
Microbes	0	0			0		0	
Lead, mercury, arsenic	0	0	0	0	0	0	0	0
Methanol								
Formaldehyde						0		
Thioglycolic acid				0				0
Phenol; Hydroquinone							0	
Sexual hormone	0	0						
Sun screener					0			
Oxidative hair dyes			0					

Chlormethine, cantharidin	0							
pH				0			0	0
$\alpha$ -hydroxy acid								
Antibiotcs and andmetronidazole								
Antidangdruff agents								
Asbestos								
Acute eye stimulation test	0		0	0				
Acute skin stimulation test				0				
Multi-time skin stimulation test	0	0			0	0	0	
Derma feedback to anomalism	0	0	0	0	0	0	0	0
Skin phototoxicity test	0				0		0	

Reverse Mutation Test to salmonella typhimurium	0	0	0					
Cells chromosome aberration test of cultured mammalian animal	0	0	0					
Human patch test					0	0	0	
Human trial test	0	0						0
Test period ( days )	160	160	80	60	105	105	105	160
Number of samples for test ( pcs )	21	17	14	14	24	15	19	10
Test charge ( RMB )	36200	31200	7100/14200	9200/18400	13000	10000	13000	7100

Remark:

1. Once a product has more than two individual packages or separated parts (*like blusher, eyes shadow, powder pact*) with deferent ingredient composition, such packages or parts shall be tested respectively
2. Those with alcohol  $\geq 75\%$  (w/w) needn't take microbes test.
3. Those without antibacterial agent in the formula (*like physical hair removal, pure herbal hair dye*) shall take microbes test.

- 
4. Those with the content of alcohol and isopropanol  $\geq 10\%$  (w/w) shall take methonal test.
  5. Besides sun screen products, those with sunscreen  $\geq 0.5\%$  (w/w) (*excluding titanium dioxide and zinc oxide*) shall take sunscreen test, experiment of derma feedback to anomalism and skin phototoxicity test, which charge RMB6000 in total.
  6. Those who claims to have  $\alpha$ -hydroxy acid or  $\alpha$ -hydroxy over  $\geq 3\%$  (w/w) in the formula shall take  $\alpha$ -hydroxy acid and PH test which costs RMB900 in total.
  7. Those products which claims to fight acne, acarid shall take antibiotcs and metronidazole test which costs RMB1000.
  8. Those products which claims to have anti-dangdruff effect shall take anti-dangdruff agent test which costs RMB900.
  9. Those with talc in the formula shall take asbestos test which costs RMB 1000.
  10. Hair dye product which has two or more formulations shall take hygiene and chemical test accordingly against each formula.
  11. Every single sample for test shall have its net weight over 25g , otherwise, more samples shall be supplemented.
